MYSTERY CRITTERS

CRITTER CHESS

HORSE

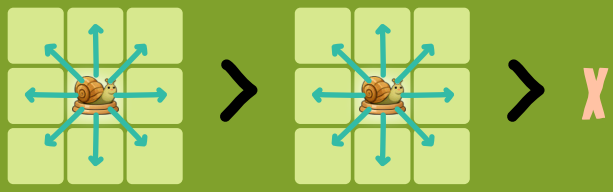

Moves in an L-shape: one step straight, one step diagonal. (Like the infamous Knight in real Chess!)

SNAIL

They can only move one step in any direction, and only move twice in the entire game. (Snails are slow!)

OWL

Moves diagonally and can jump over multiple pieces at once. (The owl is a strong flier!)

FROG

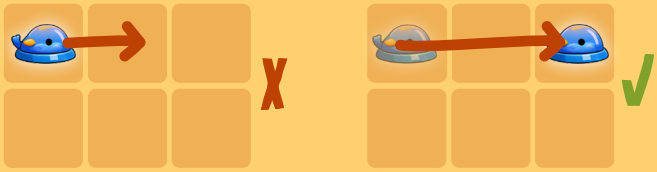

Moves in any direction. MUST jump over at least one other piece. (It just likes jumping too much.)

WHALE

Moves straight and MUST move at least 2 spaces. (It's so big that it can't take tiny steps.)

MOUSE

Moves diagonally. Does NOT want to move at all if there is another piece next to them (left/right/up/down).

CHICK

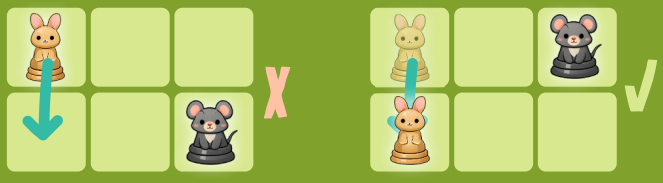

Moves diagonally, but NOT to a space at the EDGE of the board. (The chick needs to stay close to the mother hen!)

BUNNY

Moves straight. Only wants to move if there's another piece on the same line (= same row or column).

BUTTERFLY

Moves in any direction, but NOT to a space with a piece next to it. (It wants to fly free!)
